

CollectionBuilder Maps Metadata Entry Procedures

Follow these instructions **precisely**; CollectionBuilder has very strict formatting requirements. Incorrect formatting will cause link breakage on the website. **PLEASE ASK a staff member any questions as they arise.**

The fields you will leave blank are shaded dark grey in your assigned spreadsheet. Staff will complete those fields at a later time.

Special Instructions:

- For fields that require a defined entry, the entry will be listed in this table with quotation marks. ***Do not copy the quotation marks into the spreadsheet.***
- You will copy some information from existing entries in your assigned table. Those fields are indicated with asterisks (**) in this table.
 - Duplicate the information from those fields in the folder content sheet entry for the same fields for all documents in that folder.
 - Find the correct mine, copy the field contents, and paste into the new section. Leave this field blank if there is no information in the existing entry's field contents.

Field Name	Field contents
objectid	Map id from database
filename	LEAVE BLANK
document type	Choose one of the following appropriate for the object: (Must be typed EXACTLY how it appears below) Maps
map type	Choose from the following: claim, underground, composite, plan, workings, surface, longitudinal, vertical long sections, cross section, geologic, stope, assay, sample, topographic, location
